PROFESSIONAL SUMMARY

AI-focused software engineer, Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103) and Azure AI Fundamentals (AI-901), with hands-on experience shipping real AI features — a retrieval-augmented chatbot grounded in a business's own documents, and NLP-driven resume analysis. Full-stack delivery across Python/Flask, React, and SQL, all deployed. Open to on-site, hybrid, or remote Software Engineer and Full-Stack Developer roles in applied AI and full-stack engineering.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, C#, HTML/CSS

Frameworks & Libraries: Flask, React, React Native (Expo), SQLAlchemy, NLTK

Databases: PostgreSQL, Microsoft SQL Server, SQLite, Azure SQL, MySQL

DevOps & Deployment: Render, Vercel, GitHub Actions (CI/CD), Docker

AI & Automation: RAG, Google Gemini API, sentence-transformers, NLP (NLTK), n8n automation workflows

Data & Analytics: Power BI, Tableau, Jupyter Notebook, pandas

Tools: Git & GitHub, Visual Studio, VS Code, Cisco Packet Tracer

PROFESSIONAL EXPERIENCE

Data Analyst — Internship

MetLife | Remote (Dubai, UAE) | Nov 2025 – Jul 2026

- Completed a 9-month remote internship supporting data analysis and reporting for a global insurance provider, using SQL to query and review datasets and Microsoft Excel and Power BI to prepare reports.

PROJECTS

Floss Clinic — Dental Clinic Management Platform

Solo Full-Stack Project | Python, Flask, SQLAlchemy, React, Vite | 2026

- Designed and deployed (Vercel + Render) a full-stack clinic platform with conflict-safe appointment booking, enforced at the database level via a half-open interval check and a partial unique index.
- Implemented mandatory two-factor authentication (TOTP and email OTP) for staff/admin accounts, JWT-based role access control, and a full audit trail for every role change.
- Developed a retrieval-augmented (RAG) chatbot grounded in the clinic's own documents (sentence-transformer embeddings, cosine retrieval) with a confidence threshold, so it says “I don't know” instead of guessing.
- 380+ automated tests (268 backend, 114 frontend) run in a GitHub Actions CI pipeline on every push.

Mori Matcha Home Cafe — Production Cafe Website

Freelance Project | React/Vite, Vercel Serverless Functions, Postgres | 2026

- Designed and shipped a live website for a real cafe business — deployed and in use, not a demo — with a cart-based ordering flow, a Postgres order log, and an admin dashboard for incoming orders.

- Integrated a live Google Reviews sync merged with a curated fallback list, plus full SEO/PWA support (structured data, installable manifest) and Vercel Analytics.

Library Management System — Role-Based Web App

Solo Project | Flask, SQLite, pytest | 2024 – 2026

- Built and deployed a role-based (owner/admin/member) library system with CSRF-protected, rate-limited authentication and a searchable book catalogue with auto-fetched cover art via the Open Library API.
- Closed a privilege-escalation gap by re-validating each user's role against the database on every request, so a demoted or deleted account loses access immediately instead of after session expiry.

Expense Tracker — Cross-Platform Mobile & Web App

Solo Project | Flask REST API, React Native/Expo (TypeScript), Postgres | 2025 – 2026

- Rebuilt an earlier desktop CRUD prototype into a JWT-authenticated Flask REST API deployed on Render against a Postgres database (Neon), paired with a React Native/Expo mobile app.
- Shipped as a real, installable Android APK via EAS Build and a web build on Vercel, with per-user currency preferences, budget tracking, and CSV export.

Smart Resume Analyser — AI-Assisted Resume Scoring Platform

Final Year Project | Python, Flask, NLTK, Postgres | 2026

- Built an end-to-end resume analysis platform using NLP (NLTK) for skill extraction and scoring, with OCR-based PDF/image parsing (PyMuPDF, Tesseract).
- Implemented ATS-compatibility simulation, job-description matching, a guided resume builder, and an analytics dashboard with CSV/JSON export for Power BI.
- Integrated a Google Gemini-powered assistant into the resume builder for real-time writing suggestions and gap analysis, with ATS-parseable PDF export and SendGrid password-reset email.

CERTIFICATIONS

- Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103) — September 2026
- Microsoft Certified: Azure AI Fundamentals (AI-901) — July 2026
- AI Automation Specialist — Jobescape, March 2026

EDUCATION

BEng (Hons) Software Engineering

University of Greater Manchester, Ras Al Khaimah, UAE | Graduated: 2026

Final Year Project: Smart Resume Analyser. Relevant coursework: Advanced Software Development, Advanced Databases & Big Data Technologies, Data Structures & Algorithms, Professional Practice in IT.

Prior education: BTEC International Level 3 in Engineering (Double Merit), Western International College, Ras Al Khaimah, UAE, 2021–2022. Senior High School, STEM (With Honors), Far Eastern University, Philippines, 2020–2021.

ACHIEVEMENTS & AFFILIATIONS

- IEEE Clap-Switch Electrical Project — Institute of Electrical and Electronics Engineers (IEEE), 2022
- Academic Excellence, Best in Research, Enthusiastic Learner Awards — Far Eastern University, 2021
