Dondie Godwin Gatan

Full-Stack Software Engineer | Data & AI

Dubai, UAE | +971 54-358-2924 | dondiegodwin@gmail.com
LinkedIn: linkedin.com/in/dondie-godwin-gatan | GitHub: github.com/DondieGatan | Portfolio: dondiegatan.github.io/dondiegatan-portfolio

PROFESSIONAL SUMMARY

Software Engineer and full-stack developer (BEng Hons Software Engineering, studies completed May 2026) who has been building and deploying web, mobile and AI applications (including LLM and RAG systems) since 2024 using Python, TypeScript, JavaScript, Flask, React and PostgreSQL. Delivered five live applications, including a live ordering website for a real cafe business and a dental clinic platform with a RAG chatbot, an AI booking assistant, mandatory two-factor authentication and 600+ automated tests. Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103) and Azure AI Fundamentals (AI-901). Open to on-site, hybrid or remote Software Engineer, Full-Stack Developer and AI Engineer roles in the UAE. UAE resident, available to start immediately.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, SQL, C#, HTML, CSS

Frameworks & Libraries: Flask, React, React Native, Expo, Node.js, Express, Vite, SQLAlchemy, NLTK, pandas, pytest, Vitest (unit testing)

AI & Machine Learning: Generative AI, Large Language Models (LLMs), Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), Google Gemini API, Sentence Transformers, scikit-learn, OCR, Hugging Face

Data & Analytics: SQL, pandas, Power BI, Microsoft Excel, Jupyter Notebook, Data Visualization, Reporting

Databases: PostgreSQL, Microsoft SQL Server, Azure SQL, SQLite, MySQL

Cloud & DevOps: Docker, GitHub Actions, CI/CD, Vercel, Render, Neon, EAS Build

APIs & Security: REST APIs, JWT, TOTP, CSRF Protection, SendGrid

Tools: Git, GitHub, VS Code, n8n

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | Mori Matcha Home Cafe, Remote | Sep 2026 – Present
Live: mori-matcha-inky.vercel.app | Code: github.com/DondieGatan/mori-matcha

- Built and maintain a live ordering website for a real cafe business, in production since September 2026 and taking real customer orders with online and cash payments, using React/Vite, Vercel Serverless Functions, and PostgreSQL.
- Developed a cart-based ordering system backed by a PostgreSQL order log, an admin dashboard for managing orders, order statuses, drink availability and CSV export, and an event Party Cart page with a booking-inquiry builder.
- Built a digital loyalty stamp card (nine stamps, tenth drink free) with server-side anti-cheat rules, an append-only ledger, expiry dates and 66 automated tests.
- Built "Ask Mori", a voice-enabled assistant (Web Speech API) powered by Google Gemini with a rule-based fallback and input guardrails.
- Integrated Google Reviews synchronization with a curated fallback system, implemented SEO/PWA features including structured data and an installable web app manifest, and added production monitoring with Vercel Analytics.

PROJECTS

Floss Clinic – Dental Clinic Management Platform | Python, Flask, SQLAlchemy, React, Vite | 2026
Live: floss-beta.vercel.app | Code: github.com/DondieGatan/floss

- Designed and deployed a full-stack dental clinic management platform using Vercel and Render with secure appointment scheduling, role-based access control, staff authentication, and audit logging.
- Implemented mandatory two-factor authentication using TOTP and email OTP, JWT-based authorization, and database-level protection against conflicting appointments.
- Developed a Retrieval-Augmented Generation (RAG) chatbot grounded in clinic documents using Hugging Face sentence-embedding retrieval and cosine similarity search, with Google Gemini generating grounded, cited responses

under confidence thresholds and token streaming.
- Built an AI booking assistant with a propose-then-confirm tool loop (nothing is saved until the patient confirms) and Gemini and Groq behind one adapter with automatic failover.
- Wrote 605 automated tests (446 backend, 159 frontend) that run on every push through a GitHub Actions CI pipeline.

Smart Resume Analyser – AI-Assisted Resume Scoring Platform | Python, Flask, NLTK, PostgreSQL | 2026
Live: smart-resume-analyser-z09z.onrender.com | Code: github.com/DondieGatan/Smart-Resume-Analyser
- Built an end-to-end resume analysis platform using NLP for skill extraction and resume scoring.
- Implemented OCR-based PDF and image parsing using PyMuPDF and Tesseract.
- Developed ATS compatibility simulation, job-description matching, a guided resume builder, and an analytics dashboard (data visualization) with CSV/JSON export for Power BI.
- Integrated a Google Gemini-powered AI assistant into the resume builder for real-time writing suggestions and full-resume gap analysis, and added SendGrid-based transactional email for account verification and password reset.
- Added Gemini-powered cover letter, interview prep and LinkedIn profile tools, and wrote 140+ automated tests.

Expense Tracker – Cross-Platform Mobile & Web Application | Flask REST API, React Native/Expo (TypeScript), PostgreSQL | 2025 – 2026
Live: expense-tracker-web-rosy.vercel.app | Code: github.com/DondieGatan/expense-tracker
- Rebuilt a desktop CRUD application as a JWT-authenticated Flask REST API deployed on Render against a PostgreSQL database (Neon), with a SendGrid-backed forgot-password flow.
- Developed a React Native/Expo mobile application with per-user currency preferences, budget tracking, and CSV export.
- Added AI-assisted features, natural-language expense entry and month-end spending insights, with guardrails (figures calculated in Python, Gemini only words them) and rule-based fallbacks.
- Built an installable Android APK using EAS Build, deployed the web version through Vercel, and wrote 110 backend pytest tests.

Library Management System – Role-Based Web Application | Flask, SQLite, pytest | 2024 – 2026
Live: library-management-system-s4ys.onrender.com | Code: github.com/DondieGatan/library-management-system
- Built and deployed a role-based library management system (owner, admin, member) with a searchable book catalog, CSRF-protected and rate-limited authentication, and role checks against the database on every request.
- Implemented a borrow/return workflow, a stats dashboard with CSV export and a pytest suite in GitHub Actions CI, and integrated the Open Library API for automatic book cover retrieval.

CERTIFICATIONS

- Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103) – September 2026
- Microsoft Certified: Azure AI Fundamentals (AI-901) – July 2026
- AI Automation Specialist, Jobescape – March 2026
- Delegate, Global Virtual Summit 2026, Global Emerging Leadership Programs (GELP) – September 2026

EDUCATION

BEng (Hons) Software Engineering | University of Greater Manchester, Ras Al Khaimah, UAE | 2023 – May 2026
First Class Honours | Final Year Project: Smart Resume Analyser
Relevant Coursework: Advanced Software Development, Advanced Databases & Big Data Technologies, Data Structures & Algorithms, Professional Practice in IT

BTEC International Level 3 in Engineering | Western International College, Ras Al Khaimah, UAE | 2021–2022 | Double Merit
Senior High School, STEM Strand (With Honors) | Far Eastern University, Philippines | 2020–2021

ACHIEVEMENTS

- Academic Excellence Award, Best in Research and Enthusiastic Learner Award – Far Eastern University, 2021
- IEEE Clap-Switch Electrical Project – Institute of Electrical and Electronics Engineers (IEEE), 2022
