PROFESSIONAL SUMMARY

Software Engineer and full-stack developer (BEng Hons Software Engineering, studies completed May 2026) who has been building and deploying web, mobile and AI applications (including LLM and RAG systems) since 2024 using Python, TypeScript, JavaScript, Flask, React and PostgreSQL. Delivered five live applications, including a production website for a real cafe business and a dental clinic platform with a RAG chatbot, mandatory two-factor authentication and 380+ automated tests. Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103) and Azure AI Fundamentals (AI-901). Open to on-site, hybrid or remote Software Engineer, Full-Stack Developer and AI Engineer roles in the UAE. UAE resident, available to start immediately.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, SQL, C#, HTML, CSS

Frameworks & Libraries: Flask, React, React Native, Expo, Node.js, Express, Vite, SQLAlchemy, NLTK, pandas, pytest, Vitest (unit testing)

AI & Data: Generative AI, Large Language Models (LLMs), Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), Google Gemini API, Sentence Transformers, scikit-learn, OCR, Hugging Face, Power BI, Jupyter Notebook

Databases: PostgreSQL, Microsoft SQL Server, Azure SQL, SQLite, MySQL

Cloud & DevOps: Docker, GitHub Actions, CI/CD, Vercel, Render, Neon, EAS Build

APIs & Security: REST APIs, JWT, TOTP, CSRF Protection, SendGrid

Tools: Git, GitHub, VS Code, n8n, Microsoft Excel

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | Mori Matcha Home Cafe, Remote | Sep 2026 – Present

- Designed and deployed a production website for a real cafe business using React/Vite, Vercel Serverless Functions, and PostgreSQL, with Vercel Analytics for production monitoring.
- Developed a cart-based ordering system backed by a PostgreSQL order log and administrative dashboard for managing incoming orders, plus an event Party Cart page with a booking-inquiry builder.
- Integrated Google Reviews synchronization with a curated fallback system and implemented SEO/PWA features including structured data and an installable web app manifest.

Data Analyst (Internship) | MetLife, Remote | Nov 2025 – Jul 2026

- Supported data analysis and reporting for a global insurance provider as part of a large remote team, building hands-on exposure to enterprise data workflows and cross-functional collaboration.
- Used SQL to query, organize, and review datasets, and Microsoft Excel and Power BI to prepare reports and documentation for the team.

PROJECTS

Floss Clinic – Dental Clinic Management Platform | Python, Flask, SQLAlchemy, React, Vite | 2026

- Designed and deployed a full-stack dental clinic management platform using Vercel and Render with secure appointment scheduling, role-based access control, staff authentication, and audit logging.
- Implemented mandatory two-factor authentication using TOTP and email OTP, JWT-based authorization, and database-level protection against conflicting appointments.
- Developed a Retrieval-Augmented Generation (RAG) chatbot grounded in clinic documents using Hugging Face sentence-embedding retrieval and cosine similarity search, with Google Gemini generating grounded, cited responses under confidence thresholds and token streaming.

- Wrote 380+ automated tests (268 backend, 114 frontend) that run on every push through a GitHub Actions CI pipeline.

Smart Resume Analyser – AI-Assisted Resume Scoring Platform | Python, Flask, NLTK, PostgreSQL | 2026

- Built an end-to-end resume analysis platform using NLP for skill extraction and resume scoring.
- Implemented OCR-based PDF and image parsing using PyMuPDF and Tesseract.
- Developed ATS compatibility simulation, job-description matching, a guided resume builder, and an analytics dashboard with CSV/JSON export for Power BI.
- Integrated a Google Gemini-powered AI assistant into the resume builder for real-time writing suggestions and full-resume gap analysis, and added SendGrid-based transactional email for account verification and password reset.

Expense Tracker – Cross-Platform Mobile & Web Application | Flask REST API, React Native/Expo (TypeScript), PostgreSQL | 2025 – 2026

- Rebuilt a desktop CRUD application as a JWT-authenticated Flask REST API deployed on Render against a PostgreSQL database (Neon), with a SendGrid-backed forgot-password flow.
- Developed a React Native/Expo mobile application with per-user currency preferences, budget tracking, and CSV export.
- Built and distributed an installable Android APK using EAS Build and deployed the web version through Vercel.

Library Management System – Role-Based Web Application | Flask, SQLite, pytest | 2024 – 2026

- Built and deployed a role-based library management system supporting owner, admin, and member permissions with searchable book catalog functionality.
- Implemented CSRF-protected and rate-limited authentication and integrated the Open Library API for automatic book cover retrieval.
- Strengthened authorization by validating user roles against the database on every request, ensuring access changes take effect immediately.

CERTIFICATIONS

- Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103) – September 2026
- Microsoft Certified: Azure AI Fundamentals (AI-901) – July 2026
- AI Automation Specialist, Jobescape – March 2026
- Delegate, Global Virtual Summit 2026, Global Emerging Leadership Programs (GELP) – September 2026

EDUCATION

BEng (Hons) Software Engineering | University of Greater Manchester, Ras Al Khaimah, UAE | 2023 – May 2026
Final Year Project: Smart Resume Analyser
Relevant Coursework: Advanced Software Development, Advanced Databases & Big Data Technologies, Data Structures & Algorithms, Professional Practice in IT

BTEC International Level 3 in Engineering | Western International College, Ras Al Khaimah, UAE | 2021–2022 | Double Merit
Senior High School, STEM Strand (With Honors) | Far Eastern University, Philippines | 2020–2021

ACHIEVEMENTS

- Academic Excellence Award, Best in Research and Enthusiastic Learner Award – Far Eastern University, 2021
- IEEE Clap-Switch Electrical Project – Institute of Electrical and Electronics Engineers (IEEE), 2022
